

# Quarterly Market Review: 2023-Q3

## For ClearLogic Financial

The US equity market posted a negative 3.25% return for the quarter and outperformed non-US developed markets but underperformed emerging markets. Value underperformed growth within large caps and outperformed within small caps. Small caps underperformed large caps. REIT indices underperformed equity market indices.

The first chart is a snapshot of the market performance for the third quarter. The second chart provides market returns over one, five and ten years. The third chart shows the world markets and events over the last twelve (12) months. Your 2023 third quarter portfolio review report is posted in your Tamarac portal.

# When Value Delivers

Third quarter 2023

Wes Crill, PhD, Senior Investment Director and Vice President, Dimensional Fund Advisors

The first half of 2023 marks the tenth time since 1926 that value stocks have underperformed growth stocks by more than 20 percentage points over a two-quarter period. More often than not, value has responded like the hero in an action movie, beating growth over the following four quarters in seven of the nine previous instances and averaging a cumulative outperformance of nearly 29 percentage points.

The sample size may be small, but a positive average value premium following a large negative period is not too surprising. In fact, looking at the other side of the value performance distribution, there have been 19 two-quarter periods with the value premium exceeding positive 20%. In 11 of these, value outperformance continued over the next four quarters. The average premium across all 19 was 3.6%.

It's notoriously challenging to find an indicator that consistently predicts negative value premiums. Regardless of value's recent performance, investors should expect positive value premiums going forward. That's a strong incentive for investors to maintain a disciplined stance to asset allocation, so they can capture the outperformance when value stocks deliver.

## Comeback Kid

Cumulative return difference for value minus growth in US stocks over the four quarters following two-quarter periods during which value underperformed by -20% or outperformed by +20%.

Best Regards,

ClearLogic Financial, Inc.
